# **Executive Summary**

Starting in 2008, the State of Maryland Department of Health and Mental Hygiene (DHMH) selected WBA Research (WBA), a National Committee for Quality Assurance (NCQA) certified vendor, to conduct its Provider Satisfaction Survey. WBA administered this survey to Primary Care Providers (PCPs) participating in Maryland's Medicaid managed care program, HealthChoice, via a mixed methodology survey (mail with telephone follow-up and an online survey option).

WBA mailed a total of 1,274 surveys among UnitedHealthcare PCPs, from which 205 valid surveys were completed between March and June 2017. Specifically, 118 were returned by mail, 76 were conducted over the telephone and 11 were completed online. The overall response rate for 2017 was 17%, compared to 21% in 2016.

# KEY FINDINGS FROM THE 2017 PROVIDER SATISFACTION SURVEY

# **Overall Satisfaction**

In 2017, about six in ten of the PCPs surveyed are satisfied with UnitedHealthcare (59.5%), which is lower than the proportion satisfied with All Other HealthChoice MCOs (72.3%) and lower than the HealthChoice Aggregate (75.7%). The research also shows that at least two-thirds of the PCPs would recommend UnitedHealthcare to their patients (69.7%, lower than the HealthChoice Aggregate of 84.9%) and/or to other physicians (66.5%, lower than the HealthChoice Aggregate of 84.6%).

	Summary Rate – Very or Somewhat Satisfied	Summary Rate – Definitely or Probably Yes	Summary Rate – Definitely or Probably Yes
	Overall Satisfaction	rall Satisfaction Would Recommend to Would Recommend to Would	
2017 HealthChoice Aggregate	75.7%	84.9%	84.6%
All Other HealthChoice MCOs	72.3%	N/A	N/A
UnitedHealthcare	59.5% (∀♥)	69.7% (¥)	66.5% (∀)

N/A=These questions were not asked with regards to All Other HealthChoice MCOs.

Arrows (A/V) indicate that the particular measure is performing statistically better or worse than the 2017 HealthChoice Aggregate.

Arrows (▲, ▼) indicate that the particular measure is performing statistically better or worse than All Other HealthChoice MCOs.

# Loyalty Analysis

- A loyal Primary Care Provider can be defined as someone who is both very satisfied with the MCO and willing to recommend that MCO to patients and other physicians.
- It is important for UnitedHealthcare to understand the loyalty of their provider base. From the survey, a "loyalty" analysis was conducted by combining the responses to overall satisfaction with UnitedHealthcare (Q25), likelihood of recommending UnitedHealthcare to patients (Q27) and likelihood of recommending UnitedHealthcare to other physicians (Q28). This analysis produced three categories which are used to describe provider loyalty *Loyal, Not Loyal and Indifferent*. (For a more detailed explanation of this analysis, please see the section entitled Loyalty Analysis.)
- Less than two in ten of the PCPs surveyed (13.8%, lower than the HealthChoice Aggregate of 33.7%) are considered "loyal PCPs". This leaves about three-fourths (78.7%) of the PCPs as "indifferent" (higher than the HealthChoice Aggregate of 63.5%) and 7.4% of PCPs as "not loyal" (higher than the HealthChoice Aggregate of 2.9%).

		Primary Care Provider Loyalty							
	Loyal	Indifferent	Not Loyal						
2017 HealthChoice Aggregate	33.7%	63.5%	2.9%						
UnitedHealthcare	13.8% (∀)	78.7% (♠)	7.4% (♠)						

Arrows ( $\wedge/\forall$ ) indicate that the particular measure is performing statistically better or worse than the 2017 HealthChoice Aggregate.

## **Composite Measures**

- Composite measures assess results for main issues/areas of concern. These composite measures are derived by combining survey results of similar questions.
- UnitedHealthcare received low ratings in 2017 among PCPs on many of the composite measures. The composite measures that received the lowest ratings in 2017 were:
  - Utilization Management (17.5% Summary Rate *Excellent/Very Good,* lower than the HealthChoice Aggregate of 33.5%);
  - Coordination of Care/Case Management (22.8% Summary Rate *Excellent/Very Good,* lower than the HealthChoice Aggregate of 40.6%);
  - Customer Service/Provider Relations (27.3% Summary Rate *Excellent/Very Good*, lower than the HealthChoice Aggregate of 44.3%); and
  - > Finance Issues (28.5% Summary Rate *Excellent/Very Good*, lower than the HealthChoice Aggregate of 46.3%).
- On the other hand, UnitedHealthcare received more positive ratings for "No-Show HealthChoice Appointments" (85.3% Summary Rate 0%-25%) and somewhat moderate ratings for "Overall Satisfaction" (65.2% Summary Rate Very or Somewhat Satisfied/Definitely or Probably Yes, lower than the HealthChoice Aggregate of 81.7%).

	2017 HealthChoice Aggregate	2017	2016	2015
Composite Measure	(Summary Rate – 0%-25%/Very or Somewhat Satisfied/Definitely or Probably Yes/Excellent or Very Good)	(Summary Rate – 0%-25%/Very or Somewhat Satisfied/Definitely or Probably Yes/Excellent or Very Good)	(Summary Rate – 0%-25%/Very or Somewhat Satisfied/Definitely or Probably Yes/Excellent or Very Good)	(Summary Rate – 0%-25%/Very or Somewhat Satisfied/Definitely or Probably Yes/Excellent or Very Good)
No-Show HealthChoice Appointments	80.0%	85.3%	87.0%	85.0%
Overall Satisfaction	81.7%	65.2% (¥)	62.7% (↓)	72.1%
Finance Issues	46.3%	28.5% (४)	29.8%	33.5%
Customer Service/Provider Relations	44.3%	27.3% (∀)	30.5%	36.2%
Coordination of Care/Case Management	40.6%	22.8% (∀)	21.8%	30.3%
Utilization Management	33.5%	17.5% (∀)	17.2% (↓)	26.4%

Arrows (↑,↓) indicate that particular measure is performing statistically better or worse than it did in the previous year.

Arrows (A/ $\forall$ ) indicate that the particular measure is performing statistically better or worse than the 2017 HealthChoice Aggregate.

# Composite Measures (continued)

• The individual questions (attributes) that comprise the composite measures where UnitedHealthcare received low ratings in 2017 are illustrated in the table below.

Attribute`s	2017 (Summary Rate – <i>Excellent or Very Good)</i>	2016 (Summary Rate – <i>Excellent or Very Good)</i>
Finance Issues:		
Accuracy of claims processing	33.2%	33.0%
Timeliness of initial claims processing	31.7%	34.2%
Timeliness of adjustment/appeal claims processing	20.7%	22.1%
Customer Service/Provider Relations:		
Process for obtaining member eligibility information	43.9%	49.2%
Responsiveness and courtesy of the health plan's Provider Relations/Customer Service representative	39.3%	36.5%
Customer Service/Provider Relations overall	30.8%	31.8%
Timeliness to answer questions and/or resolve problems	26.9%	27.7%
Quality of written communications, policy bulletins and manuals	24.5% (↓)	33.5%
Telephone system overall	19.0%	22.7%
Accuracy and accessibility of drug formulary and formulary updates	18.5%	24.2%
Specialist network has an adequate number of specialists to whom I can refer patients	15.5%	18.4%
Utilization Management:		
Timeliness of obtaining authorization for inpatient services	21.9%	16.4%
Timeliness of obtaining authorization for outpatient services	20.1%	18.6%
Timeliness of obtaining authorization for medication	14.1%	16.9%
Overall experience in obtaining prior authorization for medications	14.0%	16.9%

Arrows (1, 1) indicate that particular measure is performing statistically better or worse than it did in the previous year.

## **Noteworthy Findings and Conclusions/Recommendations**

- The findings obtained from the Provider Satisfaction Survey allow UnitedHealthcare to measure how well the MCO is meeting its PCPs' expectations and health care needs. Further analysis of the survey results can illustrate potential areas of opportunity for improvement.
- How PCPs rate their overall satisfaction is an important indicator of quality. It is important to understand what is driving PCPs' overall satisfaction ratings.
- Correlation analyses were conducted between each survey question that comprised the composite measures (attributes) and overall rating of satisfaction (Q25). As a result, UnitedHealthcare can ascertain which attributes have the greatest impact on PCPs' overall satisfaction ratings and ultimately determine where to direct quality improvement efforts.

## Relationship with Overall Satisfaction

- Overall, the 2017 findings show that several attributes are identified as key drivers that are of high importance to PCPs where they perceive UnitedHealthcare to be performing at a lower level (Summary Rate is less than 50%): "Coordination of Care/Case Management", "Customer Service/Provider Relations overall", "Telephone system overall", "Timeliness to answer questions and/or resolve problems" and "Timeliness of obtaining authorization for outpatient services".
  - > These attributes are referred to as *unmet needs* and should be considered priority areas for UnitedHealthcare. If performance on these attributes is improved, it could have a positive impact on PCPs' overall satisfaction.
- The following attributes are identified as moderate drivers of satisfaction on which UnitedHealthcare performs at a lower level (Summary Rate is less than 50%): "Responsiveness and courtesy of the health plan's Provider Relations/Customer Service representative", "Timeliness of obtaining authorization for inpatient services", "Quality of written communications, policy bulletins and manuals", "Timeliness of obtaining authorization for medication" and "Accuracy and accessibility of drug formulary and formulary updates". These should be considered secondary priorities for UnitedHealthcare.

# Background, Purpose and Research Approach

# **Background and Purpose**

- Beginning in 2008, the State of Maryland Department of Health and Mental Hygiene (DHMH) selected WBA Research to conduct its Provider Satisfaction Survey. WBA administered this survey to PCPs participating in Maryland's Medicaid managed care program, HealthChoice.
- The provider survey measures how well Managed Care Organizations (MCOs) are meeting their PCPs' expectations and health care needs. From this survey, we can determine PCPs' ratings of and experiences with the MCOs with which they participate. Then, based on PCPs' experiences, potential opportunities for improvement can be identified.
- Specifically, the results obtained from this provider survey will allow UnitedHealthcare to determine how well they are taking appropriate and timely actions in processing claims, assisting provider offices through accessible and helpful representatives, maintaining an adequate network of specialists and providing timely authorizations.
- Results from the provider survey summarize satisfaction through ratings, composite measures and question Summary Rates.
  - In general, Summary Rates represent the percentage of respondents who chose the most positive response categories.
- Ratings and composite measures in the provider survey include:
  - Finance Issues
  - > Customer Service/Provider Relations
  - > Coordination of Care/Case Management
  - > No-Show HealthChoice Appointments
  - > Utilization Management
  - Overall Satisfaction

# **Research Approach**

- PCPs from UnitedHealthcare who provide Medicaid services in the HealthChoice program participated in this research.
- WBA administered a mixed-methodology survey which involved mail with telephone follow-up and an online survey option.
  - Specifically, two survey questionnaire packages and follow-up reminder postcards were sent to a random sample of eligible PCPs from UnitedHealthcare with "Return Service Requested" and WBA 's toll-free telephone number included. The mail materials also included a toll-free telephone number for Spanish-speaking PCPs to complete the survey over the telephone. Additionally, the materials included a web address providers could visit to complete the survey online, if desired. Those who did not respond by mail were contacted by telephone to complete the survey. During the telephone follow-up, PCPs had the option to complete the survey in either English or Spanish.
- WBA received an electronic sample file of participating PCPs from each of the eight MCOs. WBA then combined the sample files, sorted the list by the PCP's license number and de-duplicated so that a PCP only received one survey from a specified MCO regardless of the number of MCOs with which they participate.
- In total, WBA mailed surveys to 1,274 UnitedHealthcare PCPs.

# Survey and Reporting Changes in 2017

- The Maryland Department of Health and Mental Hygiene (DHMH) made one change to the Provider Satisfaction Survey reporting in 2017.
  - Disposition codes were changed from the alphanumeric system signifying survey administration method and status of the Provider record (e.g., M21=Mail, Ineligible; T10=Phone, Complete) to a more simplified numeric system focusing on the status of the record (0=Complete, 1=Does Not Meet Eligible Population Criteria, 2=Incomplete (but Eligible), 3=Language Barrier, 4=Physically or Mentally Incapacitated, 5=Deceased, 6=Refusal, 7=Non-Response After Maximum Attempts, 8=Added to Do Not Call List).

# **Response Rates**

- WBA collected 205 valid surveys between March and June 2017, yielding a response rate of 17%. Of the 205 valid surveys
  received, 118 were returned by mail, 76 were conducted via telephone and 11 were completed online. None of the surveys
  were completed in Spanish.
- Ineligible PCPs included those who are deceased, did not meet eligible population criteria (indicated non-participation in the specific MCO) or had a language barrier (non-English or Spanish). Non-respondents included those who refused to participate, could not be reached due to a bad address or telephone number (were added to the do not call list), did not complete the survey or were unable to be contacted during the survey time period.
- The table below shows the total number of PCPs in the sample that fell into each disposition code.

Disposition Group	Disposition Code	Number
	Deceased (5)	3
	Does not meet eligibility criteria (1)	72
Ineligible	Language barrier (3)	0
	Mentally/Physically incapacitated (4)	0
	Total Ineligible	75
	Incomplete but eligible (2)	1
	Refusal (6)	72
Non-Response	Maximum attempts made* (7)	921
	Added to Do Not Call List (8)	0
	Total Non-Response	994

\*Maximum attempts made include two survey mailings and an average of three to four call attempts during office hours.

• Ineligible surveys are subtracted from the sample size when computing a response rate, as shown below.

Completed surveys (mail + phone + online)

Sample size – Ineligible surveys

= Response Rate

$$\frac{205}{1,274-75} = 17\%$$

# How to Read and Interpret the Results

- This report includes the results of the provider survey questions about PCPs' experiences with the MCO with which they
  participate.
- Throughout this report, results are shown as "Summary Rates". Summary Rates represent the most favorable responses for that question.
- Within the report, comparisons to the previous waves of research have been made only when significant differences (at the 95% confidence level) are present. Arrows (↑,↓) indicate that the particular variable is performing statistically better or worse than it did in the previous year. Therefore, if no comparison was made to the previous research, then the survey results are relatively consistent with what was seen in the previous year. Comparisons have also been made to the 2017 HealthChoice Aggregate when significant differences (at the 95% confidence level) are present.
- For various questions, the survey instrument asked respondents to rate UnitedHealthcare as well as All Other HealthChoice MCOs in which they participate. Comparisons have been made within this report, where appropriate.
- Caution should be taken when comparing results to All Other HealthChoice MCOs and when evaluating data with a small sample size or base (n<35) due to the high level of sampling error around the data, which can lead to results that do not accurately represent the MCO population as a whole.
- Percentages do not always add up to 100% due to rounding.

# **Respondent Role (Q32)**

• Composite measures are derived by combining survey results of similar questions (note: two of the composite measures are comprised of only one question). The table below shows how each standard composite measure is defined.

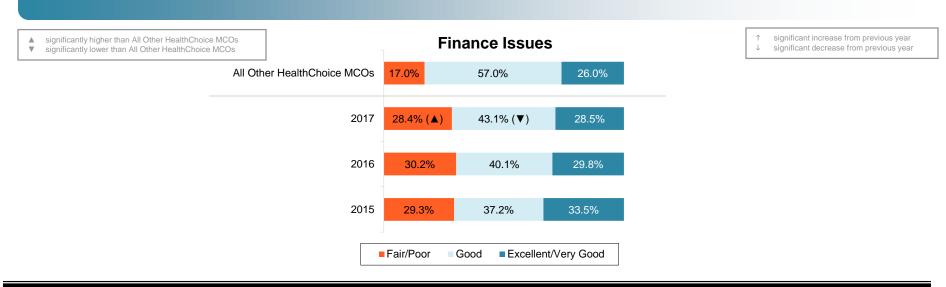

Composite Measure/Rating Item	Survey Question Number	What is Measured	Summary Rate <sup>1</sup>
Finance Issues	6 – 8	Measures PCPs' experiences with the accuracy of claims processing, the timeliness of initial claims processing and the timeliness of adjustment/appeal claims processing	% of PCPs who responded "Excellent or Very Good"
Customer Service/ Provider Relations	9 – 16	Measures PCPs' experiences with the process of obtaining member eligibility information, the PCPs' interactions with Customer Service/Provider Relations, the quality of written communications, as well as the adequacy of the specialist network	% of PCPs who responded "Excellent or Very Good"
Coordination of Care/ Case Management	19	Measures PCPs' experiences with coordination of care and case management	% of PCPs who responded "Excellent or Very Good"
No-Show HealthChoice Appointments	20	Asks PCPs to give the percentage of no-show appointments each week	% of PCPs who responded "None or 1%-25%"
Utilization Management	21 – 24	Measures PCPs' experiences with the timeliness of the authorization process	% of PCPs who responded "Excellent or Very Good"
Overall Satisfaction	25, 27 and 28	Measures PCPs' overall satisfaction with plan, likelihood of recommending plan to patients as well as to physicians	% of PCPs who responded "Very Satisfied or Somewhat Satisfied" or "Definitely Yes or Probably Yes"

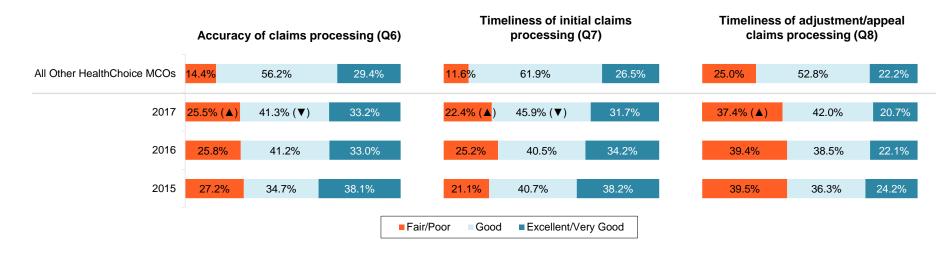

<sup>1</sup>Summary Rates most often represent the most favorable responses for that question.

Within this section, Summary Rates for UnitedHealthcare have been compared to All Other HealthChoice MCOs, where applicable.

- The tables on the following pages illustrate the proportion of PCPs that fall into each response category for all survey questions.
  - > Question Summary topics include:
    - Finance Issues
    - Customer Service/Provider Relations
    - Coordination of Care/Case Management
    - No-Show HealthChoice Appointments
    - Utilization Management
    - Overall Satisfaction
- Summary Rates have been calculated and are used to track the results from 2016 to 2017 where appropriate, as well as to make comparisons to the 2017 HealthChoice Aggregate. The Summary Rates shown represent the percentage of respondents who answered in the most positive way. Please keep in mind when reviewing this section that not all questions are designed for Summary Rates (e.g., questions that instruct the respondent to mark all that apply).
- For most of the questions, the 2017 Summary Rate for UnitedHealthcare has also been compared to the 2017 Summary Rate for All Other HealthChoice MCOs.

#### **Finance Issues**

								2	All Other HC MCOs
#	Question	n size¹	Response Categories (Blue indicates inclusion	2017	2016	2017 HC Aggregate	2017

28	Would recommend to other physicians Base=Those able to rate	194	33.5%	66.5% Yes	66.5% (¥)	62.1%	84.6%	N/A

Significant differences at the 95% confidence level are shown through the use of symbols.

A significant increase/decrease from the 2016 Summary Rate to the 2017 Summary Rate is indicated by a 1/4 by the 2017 percentage.

A A/Y by the 2017 Summary Rate percentage indicates that the 2017 Summary Rate is significantly higher/lower than the 2017 HC (HealthChoice) Aggregate.

A A/V by the 2017 Summary Rate percentage indicates that the 2017 Summary Rate is significantly higher/lower than All Other HC (HealthChoice) MCOs.

<sup>1</sup>n size=The number of respondents answering a particular question.

<sup>2</sup>Summary Rates most often represent the most favorable responses for that question.

<sup>3</sup>Overall satisfaction with the specified MCO is compared to Q26 – Overall satisfaction with All Other HC (HealthChoice) MCOs.

N/A=This question was not asked of All Other HC (HealthChoice) MCOs.

# **Segmentation Analysis**

- The provider survey asks various demographic questions about the respondent. As part of the analysis, several of these
  questions have been cross-tabulated with the composite measures and their attributes. In doing this, it can be
  determined whether UnitedHealthcare is meeting the needs of a particular population.
- On the following pages, Summary Rates for overall ratings, composite measures and their attributes are analyzed by the following demographics:
  - > Number of Physicians in Practice (Q1)
  - > Number of Mid-level Practitioners in Practice (Q2)
  - > Percent of Total Volume Represented by HealthChoice (Q3)
  - > Percent of Total Volume Represented by UnitedHealthcare (Q4)
  - > Who Completed the Survey (Q32)
  - > Method of Completing Survey (Mail, Telephone or Online)
- The percentages shown represent the Summary Rate for each segment of a demographic category. In the example below, the Summary Rate is the percentage of respondents who gave a rating of excellent or very good. The interpretation would be that 26.8% of respondents in practices with one physician rated "Timeliness of adjustment/appeals claims processing" as excellent or very good, which is a significantly higher proportion than among respondents with 2-5 physicians in their practice (10.7%).

		Physician Segments

## **Loyalty Analysis**

#### **Loyalty Analysis**

- A loyal Primary Care Provider can be defined as someone who is very satisfied with the MCO and would recommend that MCO to patients and other physicians.
- From this survey, we can determine PCP loyalty by examining responses to the following questions:
  - > Overall satisfaction with UnitedHealthcare (Q25);
  - > Likelihood of recommending UnitedHealthcare to patients (Q27); and
  - > Likelihood of recommending UnitedHealthcare to other physicians (Q28).
- These three questions are combined to develop a "loyalty" analysis. The three categories within this analysis are as follows:
  - > Loyal PCPs who are very satisfied with and would recommend UnitedHealthcare to patients and other physicians.
  - Not Loyal PCPs who are very dissatisfied with and would not recommend UnitedHealthcare to patients and other physicians.
  - Indifferent PCPs who are mixed as to whether they are satisfied with or whether they would recommend UnitedHealthcare to patients and other physicians.
- The table below illustrates the category definitions.

	Overall Satisfaction with UnitedHealthcare (Q25)		Would Recommend UnitedHealthcare to Patients (Q27)		Would Recommend UnitedHealthcare to Other Physicians (Q28)
		AND	Definitely Yes	AND	Definitely Yes
LOYAL	Very Satisfied	AND	Definitely Yes	AND	Probably Yes
		AND	Probably Yes	AND	Definitely Yes
INDIFFERENT			All other responses		
		AND	Definitely Not	AND	Definitely Not
NOT LOYAL	Very Dissatisfied	AND	Definitely Not	AND	Probably Not
		AND	Probably Not	AND	Definitely Not

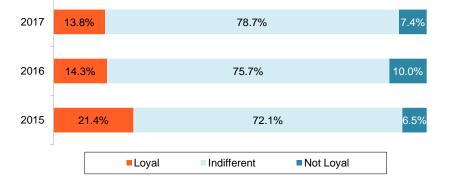

significant increase from previous year

significant decrease from previous year

Ŷ

T

Among the PCPs surveyed, less than two in ten PCPs overall (13.8%) are considered "loyal PCPs". The remaining PCPs can be classified as either "indifferent" (78.7%) or "not loyal" (7.4%).

#### Primary Care Provider Loyalty

Base=Those able to rate

## Key Driver/Correlation Analysis

#### **Key Driver Analysis**

 In an effort to identify the underlying components of PCPs' ratings of their overall satisfaction with UnitedHealthcare, advanced statistical techniques were employed. Correlation analyses were conducted between each composite measure attribute and overall satisfaction with UnitedHealthcare (Q25) in order to ascertain which attributes have the greatest impact on PCPs' overall satisfaction.

#### **Prioritizing Actions**

A key objective of any provider satisfaction research is to identify priorities for improving provider satisfaction. Doing this will allow UnitedHealthcare to focus resources on areas that are most important to PCPs and where the most improvement is needed. These areas are referred to as *unmet needs*. In addition, areas that are most important to PCPs and on which UnitedHealthcare performs relatively well are *driving strengths*. Insights can be gained by plotting these attributes based on their impact on PCPs' overall satisfaction, as shown on the following pages.

#### Attribute Relationship with Overall Satisfaction

- Overall, the 2017 findings show that several attributes are identified as key drivers that are of high importance to PCPs where they perceive UnitedHealthcare to be performing at a lower level (Summary Rate is less than 50%): "Coordination of Care/Case Management", "Customer Service/Provider Relations overall", "Telephone system overall", "Timeliness to answer questions and/or resolve problems" and "Timeliness of obtaining authorization for outpatient services".
  - > These attributes are referred to as *unmet needs* and should be considered priority areas for UnitedHealthcare. If performance on these attributes is improved, it could have a positive impact on PCPs' overall satisfaction.
- The following attributes are identified as moderate drivers of satisfaction on which UnitedHealthcare performs at a lower level (Summary Rate is less than 50%): "Responsiveness and courtesy of the health plan's Provider Relations/Customer Service representative", "Timeliness of obtaining authorization for inpatient services", "Quality of written communications, policy bulletins and manuals", "Timeliness of obtaining authorization for medication" and "Accuracy and accessibility of drug formulary and formulary updates". These should be considered secondary priorities for UnitedHealthcare.

Finance Issues

Customer Service/Provider Relations

- Coordination of Care/Case Management
- Utilization Management

#### What do you like <u>least</u> about UnitedHealthcare? (Q30)

Responses	2017 (n=146)	2016 (n=187)
Limited participating specialists/Not enough specialties covered/List of specialists is not updated	13.0%	14.4%
Unnecessary authorizations/Prescription authorizations/Pre-certification process is too untimely/Denied authorizations	12.3%	13.4%
The referral process/Require too many referrals/takes too long/are denied/Patients don't understand referral process	12.3%	13.4%
Drug formulary/Restrictive drug formulary	7.5%	5.3%
Online referral system does not work/is confusing/Doctors don't like it	7.5%	3.2%
Low reimbursements/Fee schedule	6.8%	5.3%
Slow claims processing, reimbursements/Too many denied claims/Don't offer electronic claims processing/Filing time limit	6.2%	9.1%
Don't like the automated phone system/Menus not clear/Information not updated/Can't get to a person	4.1%	2.1%
Nothing/Nothing in particular/NA	21.2% (↑)	11.8%

Significant differences at the 95% confidence level are shown through the use of symbols where the difference is found. For example, a significant increase/decrease from 2016 to 2017 is indicated by a 1/4 by the 2017 percentage.

## **Glossary of Terms**

- <u>Attributes</u> are the questions that relate to a specific service area or composite.
- <u>Complete and Valid Survey</u> is determined by indication that the member meets the eligible population criteria (the Provider participates in the specific MCO) and completion of the survey.
- <u>Composite Measures</u> are derived by combining the survey results of similar questions that represent an overall aspect of health plan quality. Specifically, it's the average of each response category of the attributes that comprise a particular service area or composite.
- <u>Confidence Level</u> is the degree of confidence, expressed as a percentage, that a reported number's true value is between the lower and upper specified range.
- <u>Correlation Coefficient</u> is a statistical measure of how closely two variables or measures are related to each other.
- <u>Disposition Code</u> is the final status given to a Provider record within the sample surveyed. 0=Complete, 1=Does Not Meet Eligible
   Population Criteria, 2=Incomplete (but Eligible), 3=Language Barrier, 4=Physically or Mentally Incapacitated, 5=Deceased, 6=Refusal, 7=Non-Response After Maximum Attempts, 8=Added to Do Not Call List.
- <u>Driving strengths</u> are areas that, based on correlation analysis, are of high importance to Providers where HealthChoice MCOs perform well.
- Key Drivers are composite measures that have been found to impact ratings of overall satisfaction (Q25) among HealthChoice MCO PCPs.
- **Question Summaries** show the proportion of adult members that fall into each response category for all survey questions.
- <u>Segmentation Analysis</u> show results for overall ratings, composite measures and their attributes cross-tabulated by several key demographic questions.
- <u>Significance Test</u> is a test used to determine the probability that a given result could not have occurred by chance.
- <u>Summary Rates</u> generally represent the most favorable responses for a particular question (e.g., *Excellent and Very Good; Definitely* Yes and Probably Yes; Very Satisfied and Somewhat Satisfied). Keep in mind that a Summary Rate is not assigned to every question.
- <u>**Trending**</u> is the practice of examining several years of data in a comparative way to identify common attributes.
- <u>Unmet needs</u> are areas that, based on correlation analysis, are most important to Providers and where improvement is needed.
