STDs can be silent

Many sexually transmitted diseases (STDs) have no signs or symptoms. You can't see if your partner has one. You may not know you have one, and then pass it to your partner. Some STDs can be cured. However, if not treated, they can cause permanent damage.

You can get an STD from any intimate contact. The only way to prevent STDs is to not have skin-to-skin contact. But there are other things you can do to keep from spreading STDs, such as:

- Use a latex condom every time you have sexual contact of any kind.
- Limit the number of sexual partners you have.
- Tell your health care provider about your sexual activity. Be honest.
- Get tested. There are tests for most STDs. For example, sexually active women aged 25 and under should get tested for chlamydia each year.

Find Dr. Right. See your primary care provider for STD counseling and testing. Need a new PCP? Visit myuhc.com/CommunityPlan or use the **Health4Me™** app. Or call Member Services toll-free at **1-800-903-5253, TTY 711**.

Ask Dr. Health E. Hound

Q: Why does my child need to be tested for lead?

A: Lead is often found in plumbing or paint in older homes. Children can inhale or swallow lead. Too much lead in a child's body leads to lead poisoning. Lead poisoning can affect a child's blood, bones, or brain. It can cause slow growth or developmental problems.

Many children with lead poisoning don't have symptoms. That's why testing is important. Experts recommend testing at ages 1 and 2. The test is done on a few drops of blood. If the test finds lead, treatment can help. Cleaning up sources of lead can prevent lead poisoning from getting worse.

Get tested. Children might qualify to earn rewards with UnitedHealthcare myMoney Connect™. To learn more about myMoney Connect, visit UHCmyMoneyConnect.com.

The right care

UnitedHealthcare Community Plan does utilization management (UM). All managed care health plans do. It's how we make sure our members are getting the right care at the right time and in the right place.

A doctor reviews requests when care may not meet guidelines. Decisions are based on care and service as well as your benefits. We do not reward doctors or staff for denying services. We do not offer anyone financial rewards for providing less care.

Members and doctors have the right to appeal denials. The denial letter will tell you how to appeal.

Questions? Just call **1-800-903-5253, TTY 711**, toll-free.

By the book

Have you read your Member Handbook? It is a great source of information. It tells you how to use your plan. It explains:

- The benefits and services you have
- The benefits and services you don't have (exclusions)
- What costs you may have for health care
- How to find out about network providers
- How your prescription drug benefits work
- What to do if you need care when you are out of town
- When and how you can get care from an out-of-network provider
- Where, when, and how to get primary, after-hours, behavioral health, specialty, hospital, and emergency care
- Your member rights and responsibilities
- Our privacy policy
- What to do if you get a bill
- How to voice a complaint or appeal a coverage decision
- How to request an interpreter or get other help with language or translation
- How the plan decides if new treatments or technologies are covered
- How to report fraud and abuse

 **Get it all.** You can read the Member Handbook online at myuhc.com/CommunityPlan. Or call Member Services toll-free at **1-800-903-5253, TTY 711**, to request a copy of the handbook.

Spring is here!

Coping with seasonal allergies and asthma

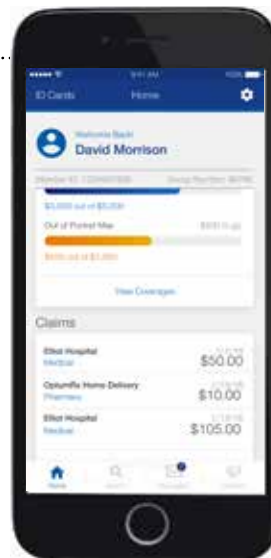

When trees get their leaves, grass grows, and flowers bloom, these plants send pollen into the air. For many people, this means allergy and asthma symptoms get worse in spring. You may have trouble breathing. You may have itchy eyes or a drippy nose. There are things you can do to feel better.

- **Check air quality.** It's often reported with the weather. It can tell you levels of different kinds of pollens and pollution.
- **If you play, garden, or exercise outdoors,** enjoy these activities in the morning or early afternoon. Springtime tree and grass pollen counts are lower at those times of day.
- **After spending time outdoors,** shower and change your clothes. This keeps pollen off your furniture and bedding.
- **Keep windows closed** in your home and car when possible.
- **Take your medicine.** If you have asthma, take your controller medication as prescribed. Carry your quick-relief inhaler with you. Follow your provider's orders for treating other allergy symptoms.

Health4Me just got better

We've updated the UnitedHealthcare Health4Me™ mobile app. It has a fresh new look and a better user experience. Now it's even easier to get the health plan information you need, when you need it.

Health4Me has many of the same features as your secure member website, myuhc.com/CommunityPlan. You can pull up your digital member ID card, search for network doctors and nearby urgent care centers, see your benefits, and even view your Member Handbook. And that's just the beginning.

 **Don't wait.** Get your health plan in your hands. Download the **Health4Me** app now from the App Store or Google Play.

Expect rewards

Join Baby Blocks.

Are you expecting a baby? Join Baby Blocks. It's an incentive program for pregnant women and new moms. You can earn up to eight gifts for going to important prenatal, well baby, and postpartum visits. Rewards range from health items, to toys and books, to gift cards.

When you join Baby Blocks, you get more than rewards. You get email and text reminders about upcoming visits. You also get helpful health information at each stage of pregnancy and new parenthood.

Join today. Just visit UHCBabyBlocks.com. You can also earn incentives through myMoneyConnect™. Visit UHCMoneyConnect.com for more information.

Health on time

Timely prenatal and postpartum care can help you have a healthy pregnancy, delivery, and recovery. Here's when to see your doctor or midwife:

- At least once before your 12th week
- Every four weeks until your 28th week
- Every two weeks until your 36th week
- Every week until delivery
- Four to six weeks after delivery
- If you have a C-section, both two weeks **and** four to six weeks after delivery
