Care Guidelines

The best care

Tools for better health

We give our providers tools, so they can best care for our members. These tools are called clinical practice guidelines. They share best practices on how to manage illnesses and promote wellness.

The guidelines cover care for many illnesses and conditions like diabetes, high blood pressure and depression. They also give advice on how to stay well with proper diet, exercise and vaccines. For more information, visit uhcprovider.com/cpg.

Health Equity

Safe and secure

How we use and protect language and cultural data

We receive information about you. This may include your race, ethnicity, language you speak, gender identity and sexual orientation. This data and other personal information about you is protected health information (PHI). We may share this information with your health care providers as part of treatment, payment and operations. This helps us meet your health care needs.

Examples of how we may use this information to improve our services include:

- To find gaps in care
- To help you in languages other than English
- To create programs that meet your needs
- To tell your health care providers which language(s) you speak

We do not use this data to deny coverage or limit benefits. We protect this information in the same way we protect all other PHI. Access is restricted to those employees who need to use it. Our buildings and computers are secured. Computer passwords and other system protections keep your data safe.

To find out more about how we protect your cultural data, visit uhc.com/about-us/rel-collection-and-use. For more information on our health equity program, visit unitedhealthgroup.com/what-we-do/health-equity.html.

- 2. Where to get your prescriptions filled.** You can find a pharmacy near you that accepts your plan. You may also be able to get certain drugs by mail.
- 3. Rules that may apply.** Some drugs may only be covered in certain cases. For example, you might need to try a different drug first. (This is called step therapy.) Utilization Management

The right care

Utilization management (UM) helps make sure you receive the right care and services when you need them. Our UM staff reviews the services your provider asks for. They compare the care and services your provider asks for against clinical practice guidelines. They also compare what is being asked for against your benefits.

When the care is not covered under your benefits, it may be denied. It may also be denied when it does not meet clinical practice guidelines. We do not pay or reward our providers or staff for denying services or approving less care. If care is denied, you and your provider have a right to appeal. The denial letter will tell you how.

If you have any questions, call Member Services toll-free at the phone number on Page 8. TTY services and language assistance are available if you need them.

Health Plan Goals

Top quality

We want the best for you

UnitedHealthcare Community Plan has a quality improvement program. It works to give members better health care and services. Each year we set goals. Then we measure how well we meet them.

Some of our goals focus on improving the number of services pregnant people and children receive. These include postpartum visits, lead screenings and immunizations. Other goals focus on making sure people with certain diseases — such as diabetes — get the tests they need to monitor their condition. We reach out to our members to encourage them to get these and other services. We do this because it helps them stay healthy and manage their conditions.

We also survey our members each year. We want to see how they feel about our health plan. We use your feedback to improve the services we provide.

Want more information on our quality improvement program and results? Call Member Services toll-free at the phone number on Page 8.

Take Care: Preventive care to keep you healthy

Primary Care

Take charge

Preparing for your provider visit can help you get the most out of it. So can making sure your provider knows about all the care you get. Here are 4 ways you can take charge of your health care:

1. **Think about what you want to get out of the visit before you go.** Focus on the top 3 things you need help with.
2. **Tell your provider about any drugs or vitamins you take.** Bring a written list.

Or bring the actual medicines. Mention who prescribed them for you.

3. **Tell your provider about other providers you see.** Include behavioral health providers. Bring copies of any test results or treatment plans from other providers.
4. **If you were in the hospital or emergency room (ER), see your provider as soon as possible after you go home.** Share your discharge instructions with them. Proper follow-up may prevent another hospital admission or visit to the ER.
